CCS 2004 Corporate Contributions

About CCS

ACM Conference on Computer and Communications Security (CCS) is ACM's oldest conference in security area. The conference was initiated in 1993. Since then it has been held twice in Fairfax (1993, 1994), and once each in New Delhi, India (1996), Zurich, Switzerland (1997), San Francisco (1998), Singapore (1999), Athens, Greece (2000) and Philadelphia (2001). The 2002 and 2003 conferences were held in Washington, DC. The 2004 conference will be held at the Wyndham hotel in Washington, DC.

From its inception CCS has established itself as among the very best research conferences in security. This reputation continues to grow and is reflected in high quality and prestige of the program. The 2003 Conference received 253 submissions, from which 35 papers have been selected for the program. The increase in the number of submissions is over 60% compared to 2002. This is a testimony of the growth and vitality of the security area, and growing importance of the CCS itself. Over the past few years, CCS has widened its scope. The 1997 Conference introduced tutorials, the 2000 conference introduced workshops and the 2003 conference introduced the industry track.
