CALL FOR PAPERS
Twelfth ACM Conference on Computer and Communications Security (CCS)
November 7-11, 2005, Hilton Alexandria Mark Center, Alexandria, VA
Sponsored by ACM SIGSAC
www.acm.org/sigsac/ccs

Papers offering novel research contributions in any aspect of computer security are solicited for submission to the Twelfth ACM Conference on Computer and Communications Security. The primary focus is on high-quality original unpublished research, case studies, and implementation experiences. Papers should have practical relevance to the construction, evaluation, application, or operation of secure systems. Theoretical papers must make convincing argument for the practical significance of the results. Theory must be justified by compelling examples illustrating its application. The primary criterion for appropriateness for CCS is demonstrated practical relevance. CCS can therefore reject perfectly good papers that are appropriate for theory-oriented conferences. **Topics of interest include:**

- access control
- authentication
- accounting and audit
- database and system security
- security for mobile code
- applied cryptography
- data/system integrity
- smart-cards and secure PDAs
- cryptographic protocols
- e-business/e-commerce
- intrusion detection
- inference/controlled disclosure
- key management
- privacy and anonymity
- security management
- intellectual property protection
- information warfare
- secure networking
- security verification
- commercial and industry security

**Paper submissions:** Submitted papers must not substantially overlap papers that have been published or that are simultaneously submitted to a journal or a conference with proceedings. Papers should be at most 15 pages excluding the bibliography and well-marked appendices (using 11-point font and reasonable margins on letter-size paper). Committee members are not required to read the appendices, and so the paper should be intelligible without them. Authors should be advised that the page limit for the final proceedings version will be 10 pages in double-columned ACM format, although they will have the option of buying a limited number of extra pages. All submissions should be appropriately anonymized (i.e., papers should not contain author names or affiliations, or obvious citations). Submissions are to be made to the web site http://www.softconf.com/start/CCS2005-Res/submit.html. Only pdf or postscript files will be accepted. Submission size should ideally be less than 1MB and no more than 2MB. Authors who have difficulty with the 2MB size limit should inform the program chair by email to ccscpchair@itd.nrl.navy.mil. Papers must be received by the deadline of May 8, 2005. Accepted papers will be presented at the conference and published by the ACM in a conference proceedings. Outstanding papers will be invited for possible publication in a special issue of the ACM Transactions on Information and System Security.

**Tutorial submissions:** Proposals for 90 minute tutorials on research topics of current and emerging interest should be submitted electronically by May 8, 2005. Tutorial proposals must clearly identify the intended audience and any prerequisite knowledge for attendees. Proposals must be no more than three pages, and must include enough material to provide a sense of the scope and depth of coverage, as well as a brief biography of the speaker(s). Tutorial presenters will receive a small honorarium.

**General Chair:** Vijay Atluri
**Program Chair (Research Track):** Catherine Meadows
**Program Chair (Industry track):** Ari Juels
**Tutorials Chair:** Rebecca Wright

**Publicity Chair:** Gail-Joon Ahn
**Treasurer:** Peng Ning
**Proceedings Chair:** Paul Syverson

**Important Dates:**
- Papers due: May 8, 2005
- Decisions due: July 29, 2005
- Final papers due: August 28, 2005

Please visit www.acm.org/sigsac/ccs for additional and up-to-date information, including information on CCS industry track, information on workshops held in conjunction with CCS, and information on where and how to submit papers and tutorials to CCS.

**Steering Committee:** S. Jajodia (Chair), R. Ganesan, P. Samarati, R. Sandhu

David Basin, ETH Zurich, Switzerland
Dan Boneh, Stanford University, USA
Jan Camenisch, IBM Research, Switzerland
Pierpaolo Degano, University of Pisa, Italy
George Dinoit, Naval Postgraduate School, USA
Yevginy Dodis, New York University, USA
Joan Feigenbaum Yale University, USA
Stephanie Forrest, University of New Mexico, USA
Cédric Gournet Microsoft Research, UK
Dieter Gollman, TU Hamburg-Harburg, Germany
Roberto Gorrieri, University of Bologna, Italy
Joshua Guttmann MITRE, USA
Cynthia Irvine, Naval Postgraduate School, USA
Somesh Jha, University of Wisconsin, USA
Jonathan Katz, University of Maryland, USA
Angelos Keromytis, Columbia University, USA
Carl Landwehr, University of Maryland, USA
Peeter Laud, University of Tartu, Estonia
Ninghui Li, Purdue University, USA
Javier Lopez, University of Malaga, Spain
Hiroshi Maruyama, IBM Japan, Japan
John Mitchell, Stanford University, USA
George Mohay, Queensland University of Technology, Australia
Mats Näslund, Ericsson Research, Sweden
Eiji Okamoto, University of Tsukuba, Japan
Hilarie Orman, Purple Streak, USA
Radia Perlman, Sun Microsystems, USA
Adrian Perrig, Carnegie Mellon University, USA
Radha Poovendran, University of Washington, USA
Rei Safavi-Naini, University of Wollongong, Australia
Andre Scedrov, U Penn, USA
Kang Shin, University of Michigan, USA
Vitaly Shmatikov, University of Texas, USA
Dawn Song, Carnegie-Mellon University, USA
Giovanni Vigna, UC Santa Barbara, USA
David Wagner, UC Berkeley, USA
Dan Wallach, Rice University, USA
Andreas Westfeld, TU Dresden, Germany
Marianne Winstead, University of Illinois, USA
Rebecca Wright, Stevens Institute of Technology, USA
Lenore Zuck, University of Illinois at Chicago, USA
