
The Sixth ACM Conference on Security and Privacy
in Wireless and Mobile Networks

ACM WiSec '13

April 17-19, 2013
Budapest, Hungary

CALL FOR PAPERS

IMPORTANT DATES

Submission Deadline: **extended to Nov 11, 2012**

Notification Date: Jan 20, 2013

Camera-Ready Deadline: Feb 15, 2013

BROADENED SCOPE

WiSec has been broadening its scope and seeks to present high quality research papers exploring security and privacy aspects of wireless communications, mobile networks, and their applications. Beyond the traditional Wisec staples of physical, link, and network layer security, we also welcome papers focusing on the security and privacy of mobile software platforms and the increasingly diverse range of mobile or wireless applications. The conference welcomes both theoretical as well as systems contributions.

Topics of interest include, but are not limited to:

- Mobile malware and platform security
- Security & Privacy for Smart Devices (e.g., Smartphones)
- Wireless and mobile privacy and anonymity
- Secure localization and location privacy
- Cellular network fraud and security
- Jamming attacks and defenses
- Key extraction, agreement, or distribution in wireless and mobile settings
- Theoretical foundations, cryptographic primitives, and formal methods for wireless security and privacy
- NFC and smart payment applications
- Security and privacy for mobile sensing systems
- Wireless or mobile security and privacy in health, automotive, avionics, or smart grid applications

The proceedings of ACM WiSec will be published by the ACM.

FULL AND SHORT PAPERS:

Full paper submissions to WiSec 2013 can be up to 10 pages in the ACM conference style excluding the bibliography and well marked appendices, and up to 12 pages in total. WiSec also encourages the submission of short papers with a length of up to 6 pages, which describe mature work of a more succinct nature. All papers must be thoroughly anonymized for double-blind reviewing. Detailed submission instructions will appear on the conference website (<http://www.sigsac.org/wisec/WiSec2013/SubInstructions.php>).

DOUBLE SUBMISSIONS:

It is a policy of the ACM (<http://www.acm.org/publications/policies/RightsResponsibilities>) to disallow double submissions, where the same (or substantially similar) paper is concurrently submitted to multiple conferences/journals. Any double submissions detected will be immediately rejected from all conferences/journals involved.

ORGANIZERS

General Chair

Levente Buttyán, Budapest University of Technology and Economics, Hungary

Technical Program Chairs

Ahmad-Reza Sadeghi, Technische Universität Darmstadt, Fraunhofer SIT, Intel-CRISC, Germany

Marco Gruteser, Rutgers University, USA

Publicity Chairs

Wenyuan Xu, University of South Carolina, USA

Panos Papadimitratos, Kungliga Tekniska Högskolan, Sweden

Publication Chair

Loukas Lazos, University of Arizona, USA

Poster/Demo Chair

Matthew Smith, Leibniz Universität Hannover, Germany

Web Chair

Márk Félegyházi, Budapest University of Technology and Economics, Hungary

Steering committee

N. Asokan, University of Helsinki, Finland

Levente Buttyán, BME, Hungary

Claude Castelluccia, INRIA, France

Jean-Pierre Hubaux, EPFL, Switzerland

Douglas Maughan, DHS, USA

Adrian Perrig, CMU, USA

Gene Tsudik, UCI, USA (chair)

Dirk Westhoff, HAW, Germany

Program Committee

N. Asokan, University of Helsinki
Giuseppe Ateniese, Johns Hopkins University
Levente Buttyan, Budapest University of Technology and Economics
Srdjan Capkun, ETH Zurich
Claude Castelluccia, INRIA Rhone-Alpes
Yingying Chen, Stevens Institute of Technology
Mauro Conti, University of Padua
Emiliano De Cristofaro, Palo Alto Research Center
Roberto Di Pietro, Universita di Roma Tre
William Enck, North Carolina State University
Sebastian Gajek, NEC
Albert Held, Daimler
Urs Hengartner, University of Waterloo
Yih-Chun Hu, University of Illinois at Urbana-Champaign
Javier Lopez, University of Malaga
Wenjing Lou, Virginia Polytechnic Institute and State University
Frank Kargl, University of Twente
Kari Kostianen, Nokia Research Center
Patrick Koeberl, Intel Corporation
Stefan Mangard, Infineon
Ivan Martinovic, University of Oxford
Heike Neumann, NXP
Cristina Nita-Rotaru, Purdue University
Guevara Noubir, Northeastern University
Kasper Bonne Rasmussen, University of California, Irvine
Pankaj Rohatgi, Cryptographic Research Incorporation
Elaine Shi, University of Maryland
Jamshid Shokrollahi, Robert Bosch GmbH
Michael Steiner, IBM Research
Wade Trappe, WINLAB, Rutgers University
Patrick Traynor, Georgia Tech
Ersin Uzun, PARC
Sean Wang, Fudan University
Wenyuan Xu, University of South Carolina
Sencun Zhu, Penn State University
